---

Full stack web developer emphasizing in React. I have designed, developed, and deployed more than 10 React apps online. I am passionate about building dynamic web applications with great looking design and UI. My strong graphic design background allows me to visualize and execute complex color, typography, and layouts in web apps. I take great pride in my work, and find joy in planning, executing, and deploying the application online. I enjoy continually sharpening my skills by learning new languages and cutting edge technologies that also allow me to refine my projects.

WORK EXPERIENCE

P. Chan and Edwards (2017-2019) Production Manager
